Alejandra Tamez de la Garza

AI Strategy and Transformation Leader

I help teams fundamentally redesign how they work.

Austin, Texas · alejandratamez.com · hola@alejandratamez.com · linkedin.com/in/alejandra-tamez-delagarza

IMPACT

13,000+

Microsoft Copilot seats across 70+ geographies, from a license to a daily habit.

Copilot and beyond: Claude, Cursor, Perplexity, GitHub.

~200

Champions Network members, so peers teach peers.

50 states

SNAP pilot at Amazon, scaled to all 50 states.

ENABLEMENT FLYWHEEL

→ LISTEN
→ ENABLE
→ MEASURE
→ AMPLIFY

LOOKING FOR

A director or senior director seat in AI enablement, adoption, and change, or a Chief of Staff seat at a founder led company with a real innovation agenda.

PROFILE

AI strategy and transformation leader who designs the systems that make adoption stick. I build the bridge between technology and the humans who use it. Since 2022 I have led GenAI enablement and change management at Applied Materials, scaling Microsoft Copilot to over 13,000 seats and building the operating model, Champions Network, and measurement frameworks behind it. I measure my work by the workflows people redesign and the strategy they unlock. I teach through analogies and say the hard thing with warmth.

EXPERIENCE

GenAI Enablement Lead and Change Management Lead, Global Supply Chain IT

Applied Materials · Austin, Texas · Oct 2022 to Present

- Own GenAI adoption strategy for the enterprise (60% of role): scaled Microsoft Copilot to over 13,000 seats across 70+ geographies with 94% sustained adoption, then widened the portfolio to Claude, GitHub, Cursor, and AI tool proofs of concept.
- Architected a 200 person Champions Network, a train the trainer system where peers teach peers and capability spreads across the company.
- Created the Enablement Flywheel (Listen, Enable, Measure, Amplify), the operating framework behind every training, tracking, and amplification decision.
- Advise business and IT leaders on AI roadmap, safety, security, governance, and MCP questions.
- Designed an AI Use Case Prioritization Framework (weighted scoring matrix and React dashboard) that ties AI investment to business value.
- Run the enterprise enablement program across business units: hackathons, leadership workshops, open hours, show and tell sessions, and a newsletter.
- Lead the build of an agentic Copilot Studio briefing agent that keeps Champions current on AI models and capabilities.
- Defined the vision for an enterprise learning MCP server that personalizes learning pathways and measures capability growth beyond login metrics.
- Pitched the Eureka innovation platform to HR leadership, reframing duplicate effort as a visibility problem so ideas get reused at scale.
- Designed the OCM Operating Model for Global Supply Chain IT (40% of role), standardizing how change is planned, led, and measured, and applied Prosci ADKAR to move people from awareness to reinforcement.
- Write Manic Monday, a weekly internal column that turns AI ideas into practical habits. I also run a nine agent AI operating system as a live test case for enterprise enablement.

Director of Marketing and Fundraising and Board Member

Bags of Grace · Austin, Texas

- Lead marketing, fundraising, and storytelling for a faith based nonprofit that mobilizes 150 to 250 volunteers at each monthly assembly.
- Built reusable AI command systems for content, a volunteer check in workflow, and a Google Apps Script Slack brief with Spanish devotionals. Publish a monthly impact newsletter that leads with narrative.
